PENNSYLVANIA DEPARTMENT OF AGRICULTURE

Organization and Services

THE PENNSYLVANIA DEPARTMENT OF AGRICULTURE is essentially a service agency created by legislative enactment to deal with administrative, regulatory, investigational and educational problems which can best be solved through public rather than individual action. The organization provides for coordination and cooperation with the Pennsylvania State College and the U. S. Department of Agriculture. The Department conducts the official Pennsylvania Egg Laying Test and cooperates with the State Farm Show Commission, the State Farm Show Committee, the State Soil Conservation Commission, and various agricultural associations. Operation of the Department is through an Executive Office and the following bureaus and divisions:

The Bureau of Animal Industry

Charged by law with the prevention, control and eradication of transmissible diseases of animals and poultry, including tuberculosis and Bang disease of animals in cooperation with the Federal Government, the Bureau—

Demonstrates to veterinarians. control methods for transmissible animal diseases; supervises vaccination for the prevention of hog cholera, anthrax, black leg, fowl pox, Bang disease and other animal diseases;

Supervises and controls sanitary conditions in slaughter houses and meat markets; ante- and post-mortem examinations of food animals and inspection of meat and meat food products for conditions that might affect their wholesomeness for human consumption; administers the laws requiring licenses for livestock dealers and brokers, abattoirs, and disposition of dead animals; provides for the inspection of various classes of livestock offered at Community Sales;

Inspects, licenses and furnishes information as to breeding, soundness and conformation of stallions and jacks standing for public service;

Enforces laws governing the sale and use of veterinary biological products;

Maintains a laboratory to investigate into the causes of transmissible animal and poultry diseases; renders diagnoses as a supplemental part of field duties of the Bureau, and aids practicing veterinarians in the diagnosis, treatment and control of animal and poultry diseases; conducts regulatory research; studies laboratory methods to perfect better methods of diagnosis and more effective methods of control;

Supervises the drawing of poultry blood to be examined for Pullorum Disease at the laboratory under the State Plan for Pullorum Disease Control;

Enforces law requiring licensing of dogs and providing for protection of livestock and people from attacks of uncontrolled dogs; appraises and determines values of damages done by dogs; pays damages to owners for livestock and poultry;

Cooperates with and assists practicing veterinarians in the supervision of livestock at the State institutions.

The Bureau of Foods and Chemistry

This Bureau has two chief functions: The safeguarding of the public health through rigid supervision of the food supply; and the prevention of fraud and deception in the manufacture, distribution and sale of food and food products and materials used for agricultural purposes.

These functions are performed through enforcement of the General Food Law of the Commonwealth which protects consumers against adulterated, misbranded, harmful, deleterious, or unwholesome food. This statute is reinforced by special legislation applying to bakery products, butter, carbonated and still non-alcoholic drinks, coffee and chickory, cream, eggs, fruit syrups, ice cream, lard, meat, milk, oysters and sausage.

In addition, the Bureau is charged with enforcement of the agricultural products laws, covering fertilizers, feeding stuffs, liming materials, insecticides and fungicides, linseed oils, paints and naval stores. These laws are designed to prevent deception and to maintain standards and quality.

The Bureau regulates and issues licenses for the manufacture and sale of oleomargarine; it licenses and regulates egg-opening plants, carbonated beverage and still drinks plants, bakeries, ice cream plants and cold storage warehouses which are regularly inspected.

Manufacturers, importers, selling agents and ultimate users of feeding stuffs, fertilizers, liming materials for agricultural purposes, linseed oils, paints, putty, turpentine, and insecticides and fungicides are protected through periodical inspections and analyses of their products and by publication of results of analyses of the first three named commodities. Registration of feeding stuffs, fertilizers, liming materials, insecticides and fungicides is required, and licenses to sell the products are issued annually.

Charges for analyses are: Feeding stuffs for resident manufacturers or purchasers, \$1.00 each; linseed oils for resident dealers, \$1.00 each; liming materials for resident producers or manufacturers, \$5.00 each (limit 2 per year).

The Bureau of Markets

The Bureau investigates and assists in the marketing of farm products, chiefly fruits and vegetables, poultry, baby chicks, eggs and potatoes;

Compiles and distributes periodic marketing information;

Advises growers on transportation of agricultural products;

Assists cooperative associations and auctions;

Establishes standard grades of farm products and maintains inspection;

Supervises operation of the Pennsylvania Official Egg Laying Contest;

Enforces the Fresh Egg Law, the Apple-Peach-Potato-Grape marking laws; baby chick regulations, and issues licenses to dealers handling agricultural products.

The Bureau of Plant Industry

This bureau tests agricultural seeds for purity and germination and enforces the State Seed Law. It also—

Inspects orchards, parks, farms, and plant imports for injurious insects and plant diseases; plans and executes programs for the control and eradication of plant pests;

Inspects and certifies Pennsylvania nurseries and all dealers in and agents for nursery stock;

Makes investigations for the control of injurious insects and plant diseases, including field tests of insecticides and fungicides;

Enforces laws governing apicultural practices, disease control and housing;

Places and enforces quarantines and carries on eradication campaigns against insect pests and plant diseases;

Inspects and certifies potatoes, corn, small grains, soy beans, peppers and tomatoes for seed purposes;

Maintains reference collections of insects, plant diseases, plants and seeds and identifies specimens;

Cooperates with the United States Department of Agriculture in many phases of plant pest control, including Japanese Beetle, Gypsy Moth, Potato Wart, etc.

The Division of Crop Reporting and Information

Assembles and disseminates essential statistics and facts pertaining to the agriculture of the State from monthly reports rendered by hundreds of volunteer crop correspondents, information which assists the producer in his sales and is of interest to all industries which deal with agricultural products.

Cooperates with the Bureau of Agricultural Economics, United States Department of Agriculture, in crop and livestock reporting and publishes summaries of the data, as follows: An annual "Crop and Livestock Report" giving county production and value estimates; semi-annual reports on the pig crop; quarterly reports of grain stocks in all positions; monthly National and State reports on crops, livestock, hatcheries, dairy and poultry products, and prices received and paid by farmers; special seasonal reports on potatoes, fruits, grapes, tobacco and truck crops; periodic reports on honey, maple products, potato stocks, grass seeds, and farm real estate, and occasional reports on turkeys, broilers, feeder-cattle, farm income and agricultural outlook.

Cooperates with the Weather Bureau and the Bureau of Agricultural Economics in compiling and releasing a weekly weather and crop report throughout the growing season; with the State Department of Internal Affairs and the U. S. Bureau of Agricultural Economics in compiling and releasing an annual report of manufactured dairy products; and with Federal and State agencies in compiling monthly livestock sales and slaughter statistics.

Engages in special activities in furtherance of Pennsylvania agriculture, making surveys to obtain data as need arises.

Conducts Department's editorial and public information work, including publication of the *Weekly News Bulletin*, official organ of the Department.

The Comptroller's Office

Performs all accounting and auditing and maintains records of the finances of the Department, its bureaus, boards and agencies.

Establishes and maintains the required accounting and budgetary control systems operated in conjunction with the Budget Bureau; is responsible for the preparation and control of all estimates of expenditures, for the preparation and audit of all appropriation requisitions, and for the preparation, audit, and approval of all requisitions for supplies or purchase requests.

Prepares monthly reports by appropriations, and cost reports by bureaus or functions; has control over the departmental storeroom and accounting records.

The Comptroller acts as agent for the Department of Revenue, and maintains or supervises the maintenance of all records relating to revenue and receipts for the department proper, departmental administrative boards, commissions, and agencies.

Available Farmers' Bulletins and Leaflets of the United States Department of Agriculture

FREE COPIES—Only one each of ten, or ten copies of one, of the unpriced publications listed below will be sent free in response to a single request, as the Department's supply is limited.

Address requests for free copies to:

Division of Publications
Office of Information
U. S. Department of Agriculture
Washington, D. C.

When ordering publications for which a cost price is indicated (5 and 10 cents each), include payment with order and mail to:

Superintendent of Documents
Government Printing Office
Washington, D. C.

CHECK YOUR ORDER CAREFULLY—The bulletins you wish should be listed in **numerical order** and your name and address should be printed plainly. Your cooperation in this matter will be appreciated and will help fill your order more promptly—U. S. Department of Agriculture.
